INTRODUCTION TO GREEN PRODUCTS:

MAKING SENSE OF GREEN PRODUCTS

MANY OF THESE PRODUCTS USE EARTH FRIENDLY "GREEN CHEMISTRY" WHICH ARE LOW IN TOXICITY, SUSTAINABLE AND NON-HAZARDOUS TO THE ENVIROMENT, PEOPLE AND ANIMALS THAT WILL COME IN CONTACT WITH THEM. OTHERS HAVE PASSED TESTING BY THE AGENCIES LISTED BELOW AND ACHIEVED THEIR CERTIFICATIONS WHICH PROVIDE STANDARDS, TESTING AND COMPLIANCE INFORMATION THAT YOUR FACILITY MAY REQUIRE. OUR GOAL IS TO PROVIDE YOU WITH A VARIETY OF CHOICES SO THAT YOU CAN CREATE A PROGRAM THAT WORKS FOR YOU. WE INVITE YOUR QUESTIONS & COMMENTS.

LET US HELP YOU GO GREEN!

DIFFERENT CERTIFICATIONS

E.P.P.:

Handy Klenz EPP - Environmentally Preferred Products meet or exceed standards which in many ways positively effect the environment and/or replace equal or similar products with newer more sustainable products. Many of these formulations meet or exceed requirements to be certified by the agencies listed below but save you money by not incurring the certification costs.

DFE:

The Design for the Environment (DfE) Program works in partnership with a broad range of stakeholders to reduce risk to people and the environment by preventing pollution. DfE focuses on industries that combine the potential for chemical risk reduction and improvements in energy efficiency with a strong motivation to make lasting, positive changes. DfE convenes partners, including industry representatives and environmental groups, to develop goals and guide the work of the partnership. Partnership projects evaluate the human health and environmental considerations, performance, and cost of traditional and alternative technologies, materials, and processes. As incentives for participation and driving change, DfE offers unique technical tools, methodologies, and expertise.

GREEN SEAL:

The Green Seal is awarded to products that have less impact on the environment and work well. To earn the Green Seal a product must meet the Green Seal environmental standard for the category as demonstrated by rigorous evaluation and testing. Green Seal standards are set so that they identify the most environmentally preferable products currently available; thus, they are leadership standards.

LEED:

LEED is a third-party certification program and the nationally accepted benchmark for the design, construction and operation of high performance green buildings. LEED gives building owners and operators the tools they need to have an immediate and measurable impact on their buildings' performance. LEED promotes a whole-building approach to sustainability by recognizing performance in five key areas of human and environmental health: sustainable site development, water savings, energy efficiency, materials selection and indoor environmental quality.

EcoLogo:

EcoLogoTM Standards are developed in an open, public, and transparent process spanning approximately 12-18 months, and are designed so that only the top 20% of products available on the market can achieve certification. Consumers can trust that products bearing the EcoLogo certification mark truly represent environmental leadership and provide tangible human health and environmental benefits.

MAROON ENVIRO STRIPPING PAD

Environmentally Conscious Non-Woven Stripping Pads

Next time you order Norton Floor Pads ask about our New Maroon Stripping Pad! These new 1/4" pads are used without hazardous stripping chemicals making the process more environmentally friendly. When you strip with a caustic agent the operator has the chance of a chemical burn and then they have to dispose of the liquid after use which retains its high acidic nature. With our pad only requiring water, we cut out the chemical safety & hazardous disposal issue.

Simple Green® is one of the most versatile all-purpose cleaners you can buy! It's non-toxic and biodegradable, without harmful bleach or ammonia. Because it is a concentrate, you can custom dilute Simple Green to clean just about anything. It replaces most cleaners, detergents, degreasers and solvents you're using now! Non-Toxic, Biodegradable, Non-Ionic, Non-Flammable, Non-Abrasive, Exempt from OSHA & EPA special handling & personal protection requirements for hazardous materials. Economical because it is a concentrate. Safer alternative to hazardous chemicals and solvents. Authorized by the USDA for use in Federally inspected meat & poultry plants.

Crystal Simple Green® is formulated for critical cleaning applications that demand a fragrance-free solution. It is a highly effective, concentrated, all-purpose degreaser and cleaner. Because Crystal Simple Green is fragrance-free, color-free and has high rinsability, it is an ideal and effective degreaser/cleaner for use in many industries. This product is ideal for industrial/manufacturing, electronics and parts washing industries. Also approved for use in Federally inspected meat and poultry plants and meets Montreal Protocol Guidelines and FDA requirements for cleaning in cosmetics, medical and pharmaceutical environments where Good Manufacturing Practices (GMP) are followed. No ozone-depleting substance warning labels required. Industrial Equipment Simple Green offers a multitude of ways to ensure proper use, dilution, mixing, and application of our outstanding cleaning products, including 30-, 60-, and 80-gallon capacity parts washers, a multi-dilution foamer, and a 4-way proportioner.

Extreme Simple Green®, Simple Green's new aircraft and precision cleaning product, cuts through tough, built up grease, oil, dirt, pollution, insect residue and impact soils. We've found no other aircraft-approved product on the market that matches Extreme Simple Green's cleaning performance. Yet, it causes no harm to aircraft structural metals, plastics, paints, or coatings. Extreme Simple Green gets its superior cleaning from a unique "triple play" cleaning formula. Two high performance surfactants and a new generation grease lifter/cutter combine to get the soil away from the aircraft surface quickly and then keep it away so that it can be cleanly rinsed away. Extreme Simple Green's speed of grease cutting and its high capacity to hold grease, oil and soils in solution during cleaning and rinsing time are the keys to performance. This equals fast cleaning and no-redeposition, but Extreme Simple Green is also able to go into oil/water separators and have oil break from solution.

LINERS

INTEPLAST HIGH DENSITY CORELESS INTERLEAVED POLY CAN LINERS

Inteplast's High Molecular Weight/ High Density Polyethylene (HMW/HDPE) can liners have many advantages over Low-Density & Low Linear can liners such as: they come packed with almost twice as many bags per case resulting in greater savings and less storage space needed. High density's greater strength properties allow customer to use a thinner bag without sacrificing the quality. The use of less plastic in production & use is better for the environment. Inteplast's High Density liners have advantages over other high density liners also. They have a star seal constructed bottom which allows them to hold more weight and easily fit into containers better than conventionally sealed bags. They are also packed in CORELESS INTERLEAVED ROLLS (see below) These rolls store, separate, and carry better than conventionally packaged bag. All bags except the "EC" are packed in white "clamshell" boxes.

The Coreless Interleaved roll is formed by overlapping quarter folded liners lengthwise, by approximately eight inches and winding them into a strong tight roll. These rolls will not telescope or unwind during shipment or handling. When a liner is pulled from an interleaved roll, it releases neatly and easily, leaving the next liner readily accessible for use. You do not have to search for the perforation or tear one liner from another.
